

Dear Authors,

Thank you for your efforts in making improvements. I have a few concerns that I believe can enhance the paper further. I have provided some suggestions for corrections below:

TITLE: Community participation and social engagement OR community engagement and social participation?? maintain consistency between title and aim of the study.

ABSTRACT

Background

- **line 17-19:** Community participation and social engagement OR community engagement and social participation?? maintain consistency between title and aim of the study

Result:

- **line 23-24:** better to rewrite this sentence as- The findings of this study indicate that the majority of participants (92%) believed that community effort would be relied upon in the event of a dengue outbreak.

INTRODUCTION

- **line 80-82:** Community participation and social engagement OR community engagement and social participation?? maintain consistency between title and aim of the study

METHODS

- **under data collection procedure- line 112:** Consent was written or verbal? clarify

RESULTS

- **In last column of the table 1, 2 and 3 :** delete N(%)=328 . N=328 is already mention in title of table so write n(%) and delete N(%)=328 in all tables
- **line 169:** delete word "regarding" and restructure this sentence as- In the case of dengue prevention roleplay, a large percentage (37%), responded positively, 34% answered negatively, and 29% remained neutral.
- **line 184:** After word Eighty, write in word as "percent" and delete this symbol %
- **line 185-187:** better to restructure this sentence as "Regarding the habit of using mosquito repellents, 249 participants (76%) answered "Yes," while only 79 participants (24%) did not use it. Among the respondents who used a repellent, coil, or spray, 76% (n=187) used it both during the daytime and evening."
